Residential Roofing

Full-service roofing, repairs, and replacements for homes across the Rockies.

Commercial Roofing

Licensed, insured solutions for flat roofs, retail, industrial and HOA buildings.

Multi-Family Projects

Specialized in large-scale and managed property projects from concept to completion.

Who We Are?

Northstar is a licensed contractor with 45+ years of combined experience. Locally owned and community-focused, we proudly serve Denver, the Front Range, Vail Valley, and Aspen.

What We Do?

We provide residential, commercial, and multi-family roofing — from full replacements to storm restoration. Fully licensed and insured, we simplify the process from inspection to insurance.

GLEN DEE ROAD

Completed: November 2024

Location: Glen Dee Road, Aspen, CO

Timeline: 3 Months (Start to Finish)

KEY FEATURES:

- Brava Synthetic Shake
- Standing Seam Shafer metals 24 gauge
- Heat Cable
- Snow retention

ABOUT THIS PROJECT:

This custom roofing project on Glen Dee Road in Aspen combined durability with mountain-town aesthetics. We installed Brava synthetic shake and 24-gauge standing seam Shafer metal to withstand heavy snow loads and temperature swings. Heat cable and snow retention features were added to enhance winter performance and protect the home through Colorado's toughest months.

DANEILSON DRIVE

Completed: June 2024

Location: Danielson Drive, Aspen, CO

Timeline: 6 Weeks (Start to Finish)

KEY FEATURES:

- Standing Seam Shafer metals 24 gauge
- Heat Cable
- Snow retention

ABOUT THIS PROJECT:

This six-week project on Danielson Drive focused on upgrading the home with a clean, modern metal roofing system built for Aspen's demanding climate. We installed 24-gauge standing seam Shafer metal for long-term durability, along with heat cable and snow retention to prevent ice buildup and protect the roof throughout the winter season.

EAGLE PARK DR.

Completed: July 2024

Location: Eagle Park Drive, Aspen, CO

Timeline: 2 Months (Start to Finish)

KEY FEATURES:

- Brava Synthetic Shake
- Copper Flashing
- Heat Cable
- Snow Retention

ABOUT THIS PROJECT:

This two-month project in Aspen's Eagle Park Drive neighborhood blended timeless materials with high-performance function. Brava synthetic shake was paired with custom copper flashing to elevate the home's curb appeal, while heat cable and snow retention systems were added to ensure winter safety and extend the roof's lifespan.

MOORE DRIVE

Completed: November 2024

Location: Moore Drive, Aspen, CO

Timeline: 2.5 Months (Start to Finish)

KEY FEATURES:

- Brava Synthetic Shake
- Copper Flashing
- Heat Cable
- Snow Retention
- Weathered Corrugated Corten Steel

ABOUT THIS PROJECT:

This 2.5-month project on Moore Drive called for a rugged, high-end roofing system tailored to Aspen's mountain climate. We installed Brava synthetic shake alongside weathered corrugated Corten steel for a striking visual contrast. Copper flashing, heat cable, and snow retention completed the build—delivering a roof that's both bold in appearance and built for year-round performance.
